ECDL Institute - Romania

#### CAE - Certificate in Advanced English | 2023

Cambridge University Press & Assessment

## PERSONAL PROJECTS

---

### Personal File Manager

- Open-source university project, designed to manage personal files and directories for individual users.
- The program allows registration with a personal email, login, and secure access to a private directory, with data encrypted and stored in separate files.
- Users can also log out safely, with all changes saved.

Technologies used: Bash

### Password Generator

- Simple yet practical project created to learn Python, JavaScript, and HTML.
- The app generates customizable passwords, allowing users to choose characters, set length, copy, delete, and regenerate passwords, with versions built for both PC and mobile (via Expo Go).

Technologies used: Python, JavaScript, HTML, Inno Setup, Expo Go

### Pixel Battle

- Collaborative demo pixel-art web app inspired by Reddit's r/Place.
- Users can create rooms, choose colors, and paint pixels together on a shared canvas.
- The project already includes core features such as user authentication, encrypted data storage, customizable color palettes, and light/dark mode.

Technologies used: HTML, JavaScript

### Personal Portfolio Website

- A personal website hosted on GitHub Pages, showcasing my CV, tech skills, and projects, along with quick access to my email, phone, LinkedIn, and GitHub.
- The site includes an interactive menu with sections such as About Me, Skills, Projects, and CV.

Technologies used: HTML, CSS, JavaScript
