ABOUT ME

Final-year Computer Science student the Faculty of Economic Cybernetics, Statistics and Computer Science, ASE Bucharest, passionate about full-stack web and application development, DevOps and cloud technologies, and database management.

Driven by a curiosity for emerging technologies and how they evolve to solve everyday problems, I also enjoy mentoring peers and leading teams and projects.

SKILLS

Programming Languages

C# (.NET Framework) | Java | JavaScript/TypeScript | C/C++ | Python | Bash

Web Development

React.js | Vite | Node.js (Express) | HTML | CSS | WordPress (PHP)

Databases

SQL | PL/SQL | Relational Databases (PostgreSQL, Oracle, MySQL) | NoSQL (MongoDB)

DevOps & Infrastructure

Linux (Arch, Ubuntu) | Git | Docker | CI/CD (GitLab CI, GitHub Actions) | Nginx

AI & GenAI

OpenAI Agents SDK | Prompt Engineering | Multi-Agent Systems

Soft Skills

Communication | Critical Thinking | Attention to Detail | Patience | English (Cambridge C1)

PROFESSIONAL EXPERIENCE & VOLUNTEERING

SiSC – The Bucharest Cybernetics Students' Union

DevOps Lead

July 2026 – Present

- Actively deploying and maintaining SiSC websites and web applications in production, using Nginx on Linux Ubuntu servers hosted on Digital Ocean.
- Monitoring and optimizing application performance and memory consumption, while managing MySQL databases and CI/CD pipelines to automate deployments.
- Mentoring the DevOps division members, helping them understand the real purpose behind DevOps practices.

Project IT Lead – CSIE Admission

Apr 2026 – Jul 2026

- Led the IT team for the CSIE Admission project, coordinating department members to develop and maintain the Admissions page on sisc.ro using WordPress, with custom HTML and CSS modifications.

FrontEnd Developer

Nov 2025 – Apr 2026

- Collaborated within a multidisciplinary team to adjust and refine the frontend of "Tap That Job", ensuring the quality and proper functioning of new features.

Orange Romania

Internship Trainee

Feb 2026 – Apr 2026

- Completed a 112-hour practicum, covering the Software Development Life Cycle, DevOps practices, and Generative AI.
- Worked hands-on with Git, Docker, and CI/CD pipelines (GitHub Actions) on a microservices-based task management application (Python/FastAPI, Node.js/Express, React), and explored Infrastructure as Code with Terraform.
- Built multi-agent systems using the OpenAI Agents SDK, implementing tool calling, structured outputs, agent handoffs, and safety guardrails.

PROJECTS

Finance Tracking App 🧠 *(In Progress)*

- Tech Stack: React Native, Expo, TypeScript, SQLite
- A cross-platform personal finance management mobile app for iOS and Android, using a local-first architecture with SQLite for on-device data storage.
- Allows users to track their balance, record income and expenses, categorize transactions, and set monthly budgets, plus visualize spending through category breakdowns and monthly trend charts, all stored locally for full privacy, with no server required.

CourtBook 🧠

- Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express, Supabase (PostgreSQL)
- Full-stack padel court booking platform, built during a 12-hour hackathon organized by SiSC through the SpringIT project.
- Implemented court search and filtering by city, surface, and availability, time-slot booking with dynamic pricing, user reviews, a personal booking dashboard, and an admin panel for managing courts, bookings, and platform statistics.

Hanged Man 🧠

- Tech Stack: Node.js, Express, SQLite, JavaScript, HTML, CSS
- Full-stack web implementation of the classic Hangman game, featuring user authentication and personal game history tracking.
- Built with a Node.js/Express backend and SQLite storage, using bcrypt-hashed passwords and session-based authentication, with a vanilla JavaScript frontend.

SQL Engine 🧠

- Tech Stack: C++, CMake
- A lightweight SQL database engine developed in C++, supporting table creation, data insertion, indexing, and CSV import.
- Includes a simple, user-friendly interactive interface designed to ensure ease of use for beginners.

EDUCATION

Faculty of Economic Cybernetics, Statistics and Computer Science, ASE Bucharest

Bachelor's Degree, Computer Science

Oct 2024 – Jul 2027

National College "Matei Basarab" Bucharest

High School Diploma, Mathematics and Computer Science

Sep 2020 – Jul 2024
